FUSION™

**Mediamounts introduces FUSION™, an Ultra Thin,
Low Profile Wall Mount Workstation, Ideal for Healthcare**

Fusion™ was designed for space constrained, high traffic areas within the healthcare environment. Complying with the [Americans with Disabilities Act \(ADA\)](#) and local fire codes, Fusion™ protrudes no more than four inches into hallways, corridors, passage ways or aisles.

Cambridge, ON. -- (February 2010) – www.mediamounts.com – Medical facilities are facing space restraints and regulations, but require computer workstations that are accessible to manage electronic medical records and patient flow. In response, Mediamounts has created [Fusion™](#), a premium wall mounted workstation that counterbalances an LCD and keyboard, with single handed adjustment. Designed mainly for hallways, this slim wall mount is also ideal for patient rooms and clinical settings where function, aesthetics and infection control are important.

In demanding healthcare environments, multiple clinicians are required to access the same workstation, round-the-clock. Mediamounts has kept this in mind with the design of Fusion™, so whether a 5' tall nurse or a 6' 5" doctor accesses the same workstation, Fusion™ adjusts smoothly through 12 inches, in a single handed motion, to meet proper ergonomics. Locking lever secures the keyboard and LCD into place.

To help ensure that regulatory codes and standards in the hospital hallways are adhered too, Mediamounts has also designed the keyboard tray to “auto-flip” up to a closed position. When the clinician completes their data entry and moves away from the workstation, the keyboard quietly retracts to the stored position, 4 inches from the wall.

About Mediamounts Ltd.

Mediamounts manufactures mounting solutions that simplify the deployment and integration of IT technology at critical points of care. With a focus on healthcare, Mediamounts products are safe, configurable and aesthetic, with an antimicrobial finish, delivered fully assembled.

Mediamounts is committed to producing the safest and most versatile mounting solutions in the industry, supported by a reputable group of dealers and integrators nationwide.
