**FOR IMMEDIATE RELEASE**

**FLUID™ Wall Mount Workstations; Installed at Point of Care throughout  
Mobile Infirmiry Medical Center**

The team at Mobile Infirmiry installs 400+ Fluid™ arms into their active hospital, in 30 days.

Mobile, AL -- (September 2010) – With the increased demand for functioning technology at bedside, Mobile Infirmiry embraced this challenge with its' plans to push the bulk of its clinical processes to the point of care. With the mandated adoption of electronic medical records, the [Fluid™ Wall Mount Workstation](#) was chosen to facilitate the delivery of EMR documentation.

Jim Farish, the Director of Medical Electronics at Mobile Infirmiry, provided some insight into the decision making process to go with Fluid™. "The team at Mobile Infirmiry, including nursing leadership and clinical staff, had the opportunity to 'touch, feel' and evaluate the Fluid™ arm before making any decision. The overall construction of the arm gave us the impression that it would be extremely durable. The fact that this mount can allow for a clinician to stand and chart, or sit and chart, was a big factor. The

extension arm allows for the computer to be mounted on a side wall, but then extend far enough around the corner so clinical staff can get to the patient at point of care. In addition, the whole arm can fit flush against the wall when not in use. Fluid™ became the clear choice for our team.”

The Fluid™ Wall Mount Workstation boasts of an impressive installation time due to the following factors:

- Fluid™ ships entirely in one box direct to the hospital
- Fluid™ is fully assembled inside the box
- Fluid™ 48” track can be mounted direct to drywall, making Fluid™ unique in it’s ability to be installed into a fully functioning hospital

“Our installation team consisted of 15 technicians who worked mostly 12 hour shifts. We worked closely with our Bed Placement Department to obtain a list of rooms first thing in the morning. By the end, we had 2 teams that would work with the nursing staff on which patients would be discharged, go to surgery, or down for tests. All we needed was an hour to do a complete install,” stated Mr. Farish.

An added benefit is the fact that the Fluid™ arm is backed by a **Lifetime Guarantee**, supported by Mediamounts’ extensive warranty, which makes Mobile Infirmar’s decision a long term one, benefiting both the hospital, its’ caring staff and ultimately the valued patient.

### **About Mobile Infirmar Medical Center**

Celebrating our centennial in 2010, Mobile Infirmar is the largest hospital in south Alabama. A leader in healthcare and technology, we are renowned for cardiovascular care and our bariatric center of excellence.

Our 704-bed hospital, including the 50-bed J.L. Bedsole/Rotary Rehabilitation Hospital, is the largest non-governmental, not-for-profit hospital in Alabama and remains the cornerstone of Infirmar Health System. Performing more than 24,000 surgeries annually, we are the second largest surgical hospital in Alabama. Contact us at 251-435-2400 or visit [www.mobileinfirmar.org](http://www.mobileinfirmar.org)

## **About Mediamounts Ltd.**

Mediamounts manufactures mounting solutions that simplify the deployment and integration of IT technology at critical points of care. With a focus on healthcare, Mediamounts products are safe, configurable and aesthetic, with an antimicrobial finish, delivered fully assembled.

Mediamounts is committed to producing the safest and most versatile mounting solutions in the industry, supported by a reputable group of dealers and integrators nationwide.
